

30. Ustun ko'inishida qo'shish

Yondosh mavzu:
Til o'rganish

Xona birliklarini
xona birliklariga
qo'shish / ayirish.

1. Qulay usulda hisoblang.

$$35 + 5 + 19$$

$$63 + 18 + 7$$

$$14 + 27 + 6$$

$$25 + 52 + 8$$

$$41 + 32 + 9$$

$$19 + 35 + 1$$

Ikki xonali sonlarni xonadan o'tib qo'shish algoritmi

Birliklarni birliklar ostiga,
o'nliklarni o'nliklar ostiga yozaman.

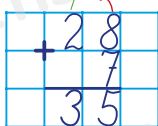

Birliklarni qo'shaman.

Birliklar yig'indisi butun o'nlikni tashkil etadi.
Uni o'nliklar ustiga yozaman.

Birliklar ostiga yig'indining
qolgan birliklarini yozaman.

O'nliklarni qo'shaman, o'nliklar ostiga yozaman.

Javobni o'qiyman

2. Misolni daftaringizda ustun ko'inishida yeching.

$$48 + 29$$

$$18 + 16$$

$$37 + 18$$

$$28 + 54$$

$$36 + 36$$

$$44 + 27$$

3. Kecha Madina ingliz tilida 15 ta so'z, bugun 18 ta so'z yod oldi. Ikki kunda Madina qancha so'z yod oldi?

4. Taqqoslang.

4 dm 5 cm ☐ 45 dm

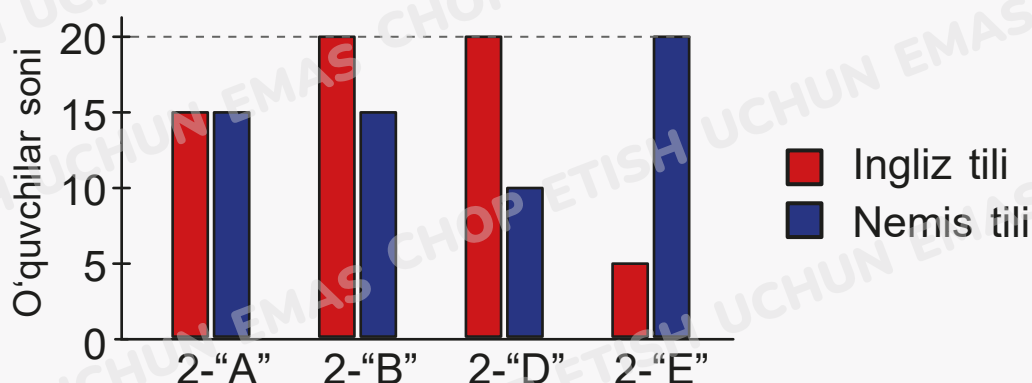

3 dm 2 cm ☐ 2 dm 3 cm

7 dm 8 cm ☐ 78 cm

8 dm 3 cm ☐ 8 dm 4 cm

5. Diagrammada sinfda qancha o'quvchi ingliz tilini, qancha o'quvchi nemis tilini o'rganishi ko'rsatilgan. Har bir sinfda necha nafar o'quvchi o'qiydi? Necha nafar ikkinchi sinf o'quvchisi ingliz tilini o'rganadi?

6. Qo'shishning guruhlash xossasidan foydalanib, misollarni yeching.

$$21 + 14 + 39$$

$$15 + 25 + 24$$

$$36 + 18 + 4$$

$$47 + 13 + 34$$

$$61 + 5 + 9$$

$$52 + 2 + 8$$

7. Bo'yi 8 cm, eni 3 cm kam bo'lgan to'g'ri to'rtburchak chizing. Uning perimetrini toping.

8. Ustun ko'rinishda yeching.

$$52 + 39$$

$$47 + 24$$

$$66 + 15$$

$$43 + 48$$

$$26 + 57$$

$$73 + 19$$
